Yearly Calendar for gardening products

Right tools for every season

Tools for Winter

While winter may be a time for rest in the garden, it can also call for snow clearing and a need for firewood.

Tools for Fall

Fall is the time to enjoy the fruits and veggies of our labour and prepare for upcoming winter.

Tools for Spring

Spring is the time for big changes in the garden, when preparation is a must for the upcoming growing season.

Tools for Summer

Summer is the time for enjoying your garden and supporting growth with care and watering.

Plant, grow, harvest.

Designed for **happy** planting & harvesting

Nothing tastes better than freedom and independence. No wonder that more and more people (also, and especially, in urban areas) are growing their own vegetables and fruit – whether on the smallest balcony, in the seasonal garden or on their own XXL plot of land. We show how easy it is to supplement supermarket shopping with your own produce.

The balcony: For the minimalist

From classic planter boxes to vertical gardening or a potato tower – the balcony offers more space for culinary self-fulfilment than one might initially think. Nevertheless, vegetables, fruit and herbs on the balcony should be one thing above all: robust and high-yielding.

WHAT GROWS ON THE SOUTH-FACING BALCONY?

Welcome to the sunny side of life with the best conditions for a small, self-catering existence. From spring to autumn everything that grows in full sun can be sown and harvested on the south-facing balcony.

However, it can even get too hot for them: Therefore, it is best to provide shade, a sunshade is usually sufficient. Large planters, pots and boxes store water well, so that you don't have to water all the time.

SOUTH

**Tomatoes
Strawberries
Rosemary
Courgettes
Bell peppers
Chillis

Chives
Beans
Cucumbers**

NORTH

**Rocket
Spinach
Ramsons
Chard
Kohlrabi
Radishes
Mache**

WHAT GROWS ON THE NORTH-FACING BALCONY?

Imagine you live on the Mediterranean. Then someone suddenly transports you to cold climes. You would die, just like plants and herbs from the Mediterranean. So with rosemary or oranges you don't even need to try it on the north balcony. Nevertheless, some things can grow there. It is best not to place the containers directly on the ground, but rather hang them on a railing or in a hanging basket. A bonus: Here the plants are more likely to forgive you if you forget to water them.

The seasonal garden: For the part-time self-supporter

Among the top five favourite gardening activities, planting and cultivating of own fruit and vegetables sits far in the lead. Many people dream of having their own garden, however few can make it a reality. This is why more and more hobby gardeners are renting a seasonal garden.

Here, as the name suggests, it is usually possible to rake, weed and harvest from March to November. Most of the plots are available in different sizes (from approx. 25 m² to 80 m²). Depending on space and taste, any fruit and vegetables can be planted.

Create a dance of color with bulbs

The last day of winter easily becomes the first day of spring if you have planted early spring bulbs like snowdrops or galanthus in the autumn months. As spring progresses to summer you can enjoy gently nodding daffodils, vibrant tulips or majestic alliums that impress every year. With these planting tips, next spring is sure to be vibrant and colorful.

PLANTING TIPS FOR TULIP BULBS

1. Fill the planter to about three quarters with soil. Dig a small hole for the bulb.
2. Place the bulb in the soil. Rule of thumb: flower bulbs must be planted three times as deep as the bulb is tall.
3. Cover the bulb loosely with soil. Only water a little, as the bulb won't develop well if too much liquid is added, or even rots.
4. All you need now is a little patience, and in no time you'll be able to enjoy the flowerage.

Planting time: September to December
Blooming period: March to June

The XXL garden: For the all-rounder

No space problems, enough distance and sufficient light – we pay tribute to large gardens. Here you can let off steam and plant what you like all year round. Those who also try their hand at winter vegetables will not only save themselves a trip to the supermarket in the colder season, they'll also do something for their good conscience, as exotic, imported fruit and vegetables often have been transported long distances.

WHAT ARE TYPICAL WINTER VEGETABLES?

Root vegetables: beetroot, parsnips, swede.

Leafy vegetables: mache, endive, chicory.

Cabbage: Curly kale, white cabbage, red cabbage.

WILL MY VEGETABLES NOT FREEZE TO DEATH IN WINTER?

While some of us take out our winter socks at temperatures below 20 degrees, most winter-proof vegetables don't even mind a light blanket of snow. Lettuce leaves freeze in frost, but they also thaw quickly. Wait to harvest them, as they could become mushy.

A person is shown from the waist down, wearing a black long-sleeved shirt and black pants, using a Fiskars shovel to dig in a garden. The shovel is orange and black, and the person is holding the handle with both hands. The background is a lush green garden with various plants and flowers. The text "Why is Fiskars #1 in cutting?" is overlaid on the left side of the image.

Why is Fiskars #1 in cutting?

Founded in 1649, Fiskars' iconic heritage of creating highly aesthetic, intuitive tools makes us proud to be a world-renowned expert in two-blade cutting and manual hand tools for gardening enthusiasts all over the world.

Design philosophy

We submerge ourselves in segmentation studies, immersive consumer interviews and usability research to find ingenious ways to continually improve our products. As a result, we've won many awards, including the prestigious RedDot Best of the Best Design Awards.

Innovation

We've developed hundreds of patents and technologies to-date, all designed to help our tools outperform the competition and feel like a natural extension of your body.

Durability & quality

In addition to using only the highest quality materials, all of our products must pass rigorous lab testing before they can be distributed.

Global leader

Already known as the world's #1 brand in scissors, our gardening tools are also top sellers in Europe, North America, Australia and the Middle East.

Commitment

If gardening is happiness, Fiskars is committed to providing tools to help you find 100% happiness in the garden.

Anvil or bypass?

Both blade and counter blade press into the wood to make clean cuts with less compression damage. In other words, the cutting blade bypasses the counter blade in a scissors-like fashion. This makes it possible to cut close to the stem, making bypass pruners ideal for cutting fresh wood.

The upper blade is forced through the wood with greater pressure as the anvil blade supports the branch, spreading pressure until the cut is complete. Anvil blades are ideal for cutting dry or dead wood.

Anvil or bypass?

BYPASS
Both blade and counter blade press into the wood to make clean cuts with less compression damage. In other words, the cutting blade bypasses the counter blade in a scissors-like fashion. This makes it possible to cut close to the stem, making bypass pruners ideal for cutting fresh wood.

ANVIL
The upper blade is forced through the wood with greater pressure as the anvil blade supports the branch, spreading pressure until the cut is complete. Anvil blades are ideal for cutting dry or dead wood.

ReNew scissors

These Fiskars scissors are skillfully crafted from recycled and renewable materials at our factory in Billnäs, Finland. The scissors handles are made from an innovative biocomposite material consisting of 66% recycled post-consumer plastic and 34% renewable cellulose fiber, a sustainable alternative to fossil-based materials. The blades themselves are also made of recycled stainless steel.

In addition to being made of recycled and renewable materials, these scissors, like all Fiskars products, are designed to be of highest quality and to offer long-lasting performance.

StaySharp™

Fiskars StaySharp™ Max Reel Mower promotes greener, healthier lawns by cleanly cutting each blade of grass with a scissors-like action. This minimises the lawn's moisture loss, while reducing exposure to disease.

A reel mower lets you cut grass without noise, uncomfortable vibrations, or any of the hazards associated with power-driven rotary blades. It is one of the most environmentally-friendly ways to cut your lawn.

- StaySharp™ cutting system cuts without unwanted contact for long-lasting performance
- Precision-ground, hardened steel blades
- Ergonomic, height-adjustable handle with padded grip for more comfort
- Directs clippings away from your feet

Chopping vs. splitting

Chopping axes

Fiskars next-generation chopping axes serve all manners of woodwork, chopping, carpentry and pruning. The range delivers a wonderful package of minimalist design and sharp-edged functionality with the right fit for all wood preparation tasks. Pick your size according to the task at hand.

The Universal Chopping Axe's thin, wide edge ensures a clean, easy cut in fresh, resinous wood, like spruce or pine.

Splitting axes

Fiskars next-generation splitting axes are a true evolution of craftsmanship –purpose-designed for one strike splits of even the thickest logs. The special blade geometry and finish is complemented by a light sturdy shaft and perfect balance. Pick your size according to the task at hand.

The Splitting Axe features a unique cutting edge that easily slices into the wood, which the thick axe blade then pushes apart.

Choose the right size for you

1. LENGTH TEST

Grab the axe on the shaft below the blade. Turn the shaft towards your armpit. If the end of the shaft reaches your armpit, the axe is too long.

2. WEIGHT TEST

Grab the axe at the end of the shaft and let the head rest towards the ground. Lift the head up while turning your wrist close to your body. The axe should be vertical in your hand by the end of this movement. If you can't lift the axe this way, the axe is too heavy.

Saws

To make sawing as easy as possible, you need a reliable saw that is up to the task. We have a variety of saws ranging from saws that cut stems and thicker branches to saws with curved noses for cutting in hard-to-reach or difficult positions.

Xtract™ Saws

Fiskars Xtract™ saws feature a unique, retractable mechanism and include an integrated belt clip for safe and easy transport and storage. Hardened steel blades ensure a long lifetime of sharpness, while a SoftGrip™ handle with finger guard ensures a safe grip.

Plus Folding saws

Fiskars Plus™ folding saws feature three cutting positions to allow you to approach every cut from the best angle. Power Tooth™ blades have razor-sharp, triple-ground teeth for quick and clean cutting, and a secure locking mechanism also holds the blade closed for safe storage and transport.

Fixed blade saws

Fiskars fixed blade saws feature a highly efficient tooth profile for fast, accurate sawing. Impulse-hardened blades stay sharper longer, while a SoftGrip™ ergonomic curved handle with finger guard ensures a safe and comfortable grip.

Bow Saws

Fiskars bow saws are excellent for sawing stems and thicker branches. A curved nose enables cutting in hard-to-reach or difficult positions. Bow saws also cut on both the push and pull stroke for efficient sawing.

Saws

Fiskars saws have teeth designed especially for wood. They allow you to prune branches and clear foliage in difficult positions safely with a lightweight saw. Fiskars Xtract™ range features a unique retractable mechanism and integrated belt clip making them safe to carry and easy to store.
